PROFILE

Backend developer with a product of my own on the market: **Snugport**, a SaaS for freelancers written entirely in vanilla JavaScript with no dependencies, with auth, cross-device sync, subscriptions billed through Stripe and an access wall enforced in Postgres RLS policies. Alongside that I work on AI model quality for Lionbridge and DataAnnotation, with more than 1,000 outputs evaluated and documented. Java, C++ and SQL; software development student with earlier specialisation in game programming. English C1, used professionally every day. Available hybrid in Valencia or fully remote.

PROFESSIONAL EXPERIENCE

AI Red-Teaming & Prompt Engineer — DataAnnotation Tech — Jan 2026 – Present

- Design of adversarial test cases to surface failures and vulnerabilities in language models.
- Evaluation rubrics to measure the quality and alignment of model responses.
- Asynchronous remote work on AI safety and alignment projects.

`Adversarial prompting · LLM evaluation · RLHF`

Freelance web developer and technician — Self-employed, Valencia — Apr 2026 – Present

- Maintenance and clean-up of the Missphone WooCommerce store, inherited from another developer: catalog, payment gateway and shipping.
- Website for Limpiezas Artemisa and management of their Google Business Profile for local reach.
- Two local businesses handled end to end, infrastructure included: domains, hosting, DNS, SSL and corporate email.

`WordPress · WooCommerce · DNS · Local SEO`

AI QA Analyst / Project Tester — Lionbridge Technologies — Jul 2025 – Present

- Evaluation of AI-generated outputs, checking logic, accuracy and factual consistency.
- More than 1,000 outputs evaluated and documented across multiple AI projects.
- Defect reports and test cases against strict quality criteria, through internal project management tooling.
- Video game testing across several platforms with Lionbridge Games; collaboration in English with international teams.

`Functional QA · Test cases · Technical documentation`

Energy Consultant & Account Manager — Selectra Sur SL, Valencia — Dec 2024 – Oct 2025

- Client portfolio management and incident resolution in a high-volume, target-driven environment.

Private tutor — Self-employed, Valencia — Sep 2018 – Present

- One-to-one lessons in maths, physics and programming; currently programming fundamentals for a web development student.

IT Support Technician · Internship — Valencia City Council, Local Police — 2019

- Tier 1 technical support and IT infrastructure maintenance in a government environment.
- Data analysis, technical documentation and process control.

PROJECTS

Snugport — own product, on the market 2026

- Control room for freelancers: hour tracker with rates, projects, client pipeline, finances, deadlines and checklists. 13 product sections, 124 files and ~28,800 lines of my own code (v2.26).
- Written entirely in vanilla JavaScript: 0 dependencies, no bundler and no frameworks. Installable PWA with its own service worker: works offline.
- Optional cross-device sync over Supabase (Postgres, Auth and Edge Functions), talking to its REST API without the official client. Mac ↔ Windows round-trip validated live.
- Four Edge Functions in TypeScript on Deno (~800 lines). The Stripe webhook verifies signatures with HMAC-SHA256 and Web Crypto, without the Stripe SDK.
- On sale with monthly and yearly subscriptions, billed through Stripe with its own webhook. The wall lives in Postgres RLS policies, not in the client: the server decides, and it gates writing and never reading, so no user data is held hostage.
- Accessibility audited (AA contrast, focus trap in modals, prefers-reduced-motion), 4 themes solved with custom properties alone and not one duplicated CSS rule, bilingual ES/EN interface and 80 currencies.

`Vanilla JavaScript · TypeScript (Deno) · Supabase · Postgres RLS · Stripe · PWA · Cloudflare Pages`

snugport.app

DragonQuestHispano — own project, in production 2026

- The first Spanish-language site about Dragon Quest Smash/Grow: guides, tier lists and news. Around 1,500 unique visitors and 35,000 requests a month.
- Built with Hugo and deployed via CI/CD on Cloudflare Pages, served over CDN with custom cache rules.

`Hugo · Markdown · Cloudflare Pages · CI/CD`

dragonquesthispano.com · github.com/FritzReigar/dragonquesthispano

CPP-Galaxian-Engine — personal, completed 2023

- Native recreation of the Galaxian arcade game with no commercial engine: custom game loop, entity management with static arrays, a state machine for enemy AI and hand-written AABB collisions.

`C++ · Custom engine`

github.com/FritzReigar/CPP-Galaxian-Engine

Unity-3D-Combat-Prototype — personal, completed 2023

- Third-person character controller in Unity: Rigidbody physics, orbital camera, ground detection and a hitbox/hurtbox system for combat.

`C# · Unity`

github.com/FritzReigar/Unity-3D-Combat-Prototype

TECHNICAL SKILLS

Languages: Java, C++, C#, Python, SQL (PostgreSQL, MySQL), JavaScript, TypeScript, HTML, CSS.

Infrastructure and tooling: Git, GitHub, Docker, Linux (Bash), Cloudflare Pages, Supabase, Maven, IntelliJ IDEA, CI/CD.

AI and quality: LLM evaluation, AI auditing, RLHF, adversarial prompting, test case design, defect reporting, unit testing.

Web: WordPress, WooCommerce, local SEO, Google Business Profile, DNS, hosting.

EDUCATION

Higher National Diploma in Multiplatform Application Development (DAM) — IES El Grao, Valencia In progress

- Backend development, OOP, software architecture and database management.

Specialisation in Video Game Design and Development — ESAT, Valencia

- Game programming in C++ and Unity (C#), focused on architecture and performance.

LANGUAGES

Spanish: native.

Valencian: C1.

English: C1, used professionally every day at Lionbridge and DataAnnotation.

German: A2.
