PROFILE

Web and product developer. I build and run **Snugport**, a SaaS for freelancers on sale, and I build websites and online shops end to end for local businesses. Alongside that I evaluate AI models for Lionbridge and DataAnnotation. I work with AI-assisted development, automated tests and CI. English C1. Available hybrid in Valencia or fully remote.

PROJECTS

Snugport — own product, on sale

2026

- Control room for freelancers: hour tracker with rates, projects, client pipeline, finances, deadlines and checklists. The production version, in vanilla JavaScript with no dependencies, is an installable PWA that works offline.
- Ongoing migration of the dashboard to React 19 + TypeScript + Tailwind 4, alongside production: 600+ unit tests (Vitest), 300+ E2E tests (Playwright) and mutation testing.
- On sale by subscription through Stripe. Backend on Supabase (Postgres, Auth and Edge Functions in TypeScript): the paywall lives in Postgres RLS policies, not in the client.
- Accessibility audited (AA contrast, focus trap, prefers-reduced-motion), 4 themes, bilingual ES/EN interface and 80 currencies.

Vanilla JavaScript · React · TypeScript · Tailwind · Supabase · Postgres RLS · Stripe · PWA · Cloudflare Pages

snugport.app

Estudio Reigar — own website, in production

2026

- Studio website in Astro + TypeScript, bilingual ES/EN. GitHub Actions CI runs E2E tests (Playwright), accessibility (axe) and Lighthouse before publishing.

Astro · TypeScript · Playwright · GitHub Actions · Cloudflare Pages

estudioreigar.com

CPP-Galaxian-Engine — personal, completed

2023

- Native recreation of the Galaxian arcade game with no commercial engine: custom game loop, entity management with static arrays, a state machine for enemy AI and hand-written AABB collisions.

C++ · Custom engine

github.com/FritzReigar/CPP-Galaxian-Engine

DragonQuestHispano — cross-module class project, discontinued

2026

- Spanish-language guide site for Dragon Quest Smash/Grow, built with Hugo and deployed via CI/CD on Cloudflare Pages.

PROFESSIONAL EXPERIENCE

Freelance web developer — Estudio Reigar, self-employed, Valencia

Apr 2026 — Present

- Websites, online shops and Google listings for local businesses, end to end: development, domain, hosting, DNS, SSL and business email.
- Limpiezas Artemisa: 13-page static site on Cloudflare Pages with local SEO, security headers (CSP, HSTS) and mobile Lighthouse above 90, delivered in September 2026; monthly management of its Google Business Profile.
- Missphone: maintenance and fixes for its WooCommerce shop, inherited from another developer: catalogue, payment gateway and shipping.

HTML/CSS/JS · WordPress · WooCommerce · Cloudflare · DNS · Local SEO

limpiezasartemisa.com

AI Red-Teaming & Prompt Engineer — DataAnnotation Tech, self-employed

Jan 2026 — Present

- Design of adversarial test cases to surface failures and vulnerabilities in language models.
- Evaluation rubrics to measure the quality and alignment of model responses.
- Asynchronous remote work on the quality and safety of model responses.

Adversarial prompting · LLM evaluation · RLHF

AI QA Analyst / Project Tester — Lionbridge Technologies, self-employed — Jul 2025 — Present

- Evaluation of AI-generated outputs, checking logic, accuracy and factual consistency.
- More than 1,000 outputs evaluated and documented across multiple AI projects.
- Defect reports and test cases against strict quality criteria, through internal project management tooling.
- Video game testing across several platforms with Lionbridge Games; collaboration in English with international teams.

Functional QA · Test cases · Technical documentation

Energy Consultant & Account Manager — Selectra Sur SL, Valencia — Dec 2024 — Oct 2025

Private tutor in maths, physics and programming — Self-employed, Valencia — Sep 2018 — Jun 2026

IT Support Technician · Internship — Valencia City Council, Local Police — 2019

- Tier 1 technical support and IT infrastructure maintenance in a government environment.
- Data analysis, technical documentation and process control.
